

# MAHIPAL GURJALA

Full stack web developer - 8+ years · +91 94410 76540  
[mahi6535@gmail.com](mailto:mahi6535@gmail.com) · [www.github.com/mahiguru](https://www.github.com/mahiguru)

## SKILLS

**Frontend Development:** Proficient in **HTML5**, **CSS/LESS/SCSS**, and modern **JavaScript frameworks** (**Angular**, **React**), with strong expertise in **TypeScript**, **Material-UI**, and build tools like **Webpack**.

**Backend & Full-Stack Skills:** Experienced with **Node.js**, **JAVA/J2EE**, **Python** and **REST APIs**, and messaging systems (**RabbitMQ**, **Kafka**).

**Cloud & DevOps:** **AWS Certified Developer**; hands-on experience with **Docker**, **Kubernetes**, and **microservices architecture**.

**Databases:** Designed and implemented solutions for **relational** (MySQL, PostgreSQL) and **NoSQL** (MongoDB) databases, including caching with **Redis**.

**Deployment & DevOps Practices:** Deployed scalable applications to AWS and managed CI/CD pipelines for seamless releases. Published apps on **Play Store** and **App Store**, adhering to UI/UX best practices and responsive design principles.

**Strong communication skills;** collaborated with international teams in **Australia** and **Netherlands** for client-facing projects.

## EXPERIENCE

### **Tech Lead**, EPAM SYSTEMS

EPAM Systems, Inc. has leveraged its advanced software engineering heritage to become the foremost global digital transformation services provider – leading the industry in digital and physical product development and digital platform engineering services

### Project Name: **SAILPOINT**

SailPoint is a leading provider of identity security for the modern enterprise. Through AI-driven identity security, we enable our customers to streamline processes at scale to drive efficiencies and add value.

### Technical Contributions:

- Engineered identity management solutions using Angular 17, delivering secure, scalable web/mobile applications for enterprise authentication workflows.
- Architected a Microsoft Teams integration by embedding Angular applications into Teams

tabs, enabling seamless cross-platform user experiences and reducing feature duplication.

- Led migration of legacy AngularJS applications to Angular 17/18, modernizing codebases, improving performance by 40%, and aligning with current development standards through collaborative code reviews.
- Integrated Java backend APIs with MySQL and Oracle databases, optimizing query efficiency and ensuring data integrity for high-traffic systems.
- Developed a Node.js microservice to automate real-time notifications within Microsoft Teams, leveraging Microsoft Graph API to enhance user engagement and operational efficiency

### Project Name: YARA

Yara is a global leader in crop nutrition, ammonia and essential industrial solutions

#### Technical Contributions:

- Developed **hybrid mobile applications** using Angular, NgRx for state management, and Auth0 for secure identity solutions.
- **Worked on scalable backend services** with **Express.js** and integrated **Java REST APIs**, ensuring seamless data flow and system interoperability.
- **Designed and maintained reusable, high-performance Angular UI components/modules** for single-page applications, to ensure scalability and code consistency across projects.
- **Owned end-to-end development of Angular 14 front-end applications**, including architecture design, **CI/CD pipeline implementation** (e.g., GitHub Actions, Jenkins) ensuring seamless deployments

### SENIOR SOFTWARE ENGINEER, PLANON SOFTWARE SERVICES

Planon is the leading global provider of Real Estate and Facility Management software that enables building and service digitalization by integrating the diverse landscape of smart building technology, business solutions and data into one source of truth and turning that into value for building owners, building users, and service providers. Planon has implemented its comprehensive solutions for more than 2,500 clients, supported by offices and partners around the world.

- Responsible for architecting and defining the Front-end framework to solve complex designs and interactions that reflect the creative and art direction provide
- I was responsible for development and releasing of mobile application (**Angular/Ionic 4, Cordova, Nodejs, Express, Redis, Kafka, Docker and MongoDB**) and new/hot patch releases, give demos, **CI/CD** pipelines, and debug production and QA issues.
- And also developed, **Angular** web applications and common **UI library** as part of product enhancement.

- Review pull requests to ensure high quality and maintainable solutions
- And also released applications on the **App store and the Play store**.

## UI/MOBILE DEVELOPER, OAKTON CONSULTANCY

Oakton is an Australian full service digital advisory and technology solutions organization. We're focused on delivering consulting services, data analytics, business applications, and digital solutions.

- As Senior UI Developer, I was worked on developing web application using **HTML5, SCSS, JavaScript, knockout JS and jQuery**.
- Created websites and user interfaces, using standard HTML/CSS practices and Knockout JS, while incorporating data from **back-end databases and services**
- Perform UI designs and coding, creating reusable objects and templates, wireframes for web pages and email templates; manage maintenance, updates, expansions, and scaling of each design
